Specific Hazards	Low hazard heating can cause expansion or decomposition leading to violent rupture of containers. Fire dried residues may spatter upon contact with water. Keep containers cool with water spray. Only the dried residue will burn emitting acrid smoke and irritating fumes. If the dried residue has ignited, decomposition products may include: Carbon dioxide (CO ₂), and carbon monoxide (CO). Extinguish the fire using (CO ₂), dry chemical or foam. Fire fighters to use self-contained breathing apparatus if risk of exposure to products of decomposition.
Decomposition Temp.	Not applicable

6. Accidental Release Measures

Specific Hazards	In the event of a large spill: Contact supplier/manufacturer. Isolate leaking containers and stop leak if safe to do so. Contain – prevent contamination of drains and waterways. Clean up using a shovel. Collect and seal in properly labelled drums for disposal. Normally suitable for disposal at approved land waste site. Wash away residues with water.
